

By way of introduction, I work for the Snow Companies, an organization that specializes in patient education and awareness programs. To accomplish our mission, we recruit and train people living with chronic illnesses to share their experiences in an effort to help others who may have the same condition.

We would like to ask for your assistance to identify people who may be interested in participating in educational initiatives. This may include sharing their story of living with and managing their medical condition Dermatomyositis or Polymyositis. The goal of the project will be to help educate and raise awareness to encourage patients to talk more openly with their healthcare team about their own condition and potential treatment options.

If you are aware of patients or family members, who might be interested in participating in awareness initiatives, we would greatly appreciate if you could ask them to contact Tara at Tbalboni@snow-companies or [757-707-5687](tel:757-707-5687). We will gladly provide additional information and guide them through the screening process. We appreciate any help you may be able to offer in identifying interested individuals, understanding that not all who may be interested will be eligible to participate.
